## PROFESSIONAL PROFILE

- **Dedicated Backend Engineer** with **9+ years of experience** specializing in high-performance **PHP (8.x+)** and large-scale applications built using the **Symfony Framework**.
- Proven architect of complex solutions, including the design and deployment of **RESTful APIs** and mission-critical systems such as a secure licensing platform used by **5,000+ client installations**.
- Experienced in full-stack development within e-commerce environments (PrestaShop) and proficient in managing Linux-based infrastructure, including **Proxmox** and cloud-hosting solutions.
- Seeking a challenging Backend role to leverage strong problem-solving skills and technical proficiency in the Symfony ecosystem.

## WORK EXPERIENCE

### Software Engineer (Backend Focus & Architecture)

**AGTI** (Guaíçara, Brazil) | *March 2016 – Present*

- **Backend Development (Symfony Focus):** Led the development and maintenance of **RESTful APIs** using **PHP/Symfony**, managing the full development lifecycle from conception to deployment.
- **E-commerce Systems Integration:** Specialized in building and customizing platforms based on **PrestaShop (1.6–9)**, developing crucial **custom modules** for payment, affiliates, and automation.
- **Infrastructure Management:** Configured and managed Linux servers, virtualization environments (**Proxmox**), and cloud platforms, implementing scalable **automated backup and monitoring systems**.
- **Key Achievements:**
  - Architected and deployed the secure **AGTI Store Licensing and Authentication System** to prevent unauthorized module usage, successfully deployed across **5,000+ client installations**.

- Led backend development for the official **VEJA** online store in Brazil, focusing on performance optimization, module implementation, and complex logistics/payment provider integrations.
- Managed and coordinated a small team of developers and support staff.

## TECHNICAL SKILLS

**Primary Backend Stack** - Symfony (Intermediate), PHP (8.x+), SQL, MySQL/MariaDB, Doctrine ORM.

**Infrastructure & DevOps** - Proxmox (Virtualization), Linux Shell, Docker, Git/Github/Gitlab, CI/CD Principles, Automated Backup.

**API & E-commerce** - RESTful API Development, PrestaShop (1.6–9), Custom Module Development.

**Secondary Stack** - JavaScript (ES6+), HTML5, CSS3, Bootstrap, jQuery, Vue.js, Methodologies Agile Development.

## EDUCATION AND TRAINING

### Master in Computational and Applied Mathematics (EQF Level 7)

Universidade Estadual Paulista Júlio de Mesquita Filho - UNESP (Presidente Prudente, Brazil) 2014 – 2016

### Computational Engineer (EQF Level 6)

Unilins - Centro Universitário de Lins (Lins, Brazil) 2008 – 2014

## NOTABLE PROJECTS & ACHIEVEMENTS

- **VEJA Store in Brazil:** veja-store.com.br is the official e-commerce of VEJA in Brazil. I led the development using PrestaShop, working with a small team. We fully customized the storefront and implemented numerous integrations with payment gateways, carriers, CRMs, and other systems.
- **AGTI Hosting Control Panel (2023–2025):** Designed and developed a full hosting management panel in **PHP/Symfony**, utilizing **SSH automation** to manage user creation, domains, databases, and deployment in **Proxmox/Cloud environments**.
- **ICPC South America Finals – 4× Finalist (2010–2013):** Qualified four times for the regional final of the **International Collegiate Programming Contest (ICPC)**, demonstrating strong foundational skills in algorithmic thinking.

## LANGUAGE SKILLS

Portuguese - Mother Tongue

English - B1 to C1
